## Rabbit antibody to AIP1 (1050-1100)

| Code | OSA00243W |
| :--- | :--- |
| ID Tag | Rb2156-011013-WS |
| Unit size | $100 \mu \mathrm{l}$ |
| Immunogen | A synthetic peptide from aa region 1050-1100 of human AIP1 conjugated to blue carrier protein <br> was used as the antigen. The peptide is homologous in rat and mouse. |
| Conjugate | Unconjugated antibody |
| Also known | Membrane associated guanylate kinase, WW and PDZ domain containing protein 2, Atrophin 1 <br> interacting protein 1, AIP-1, Atrophin 1 interacting protein A, Membrane-associated guanylate |
|  | kinase inverted 2, MAGI-2, MAGI2, ACVRINP1 |
| Host | NZ white rabbit |

IHC-P on paraffin sections of rat spinal cord tissue.
The animal was perfused using Autoperfuser at a pressure of 110 mmHg with $300 \mathrm{ml} 4 \%$ FA and further post fixed overnight before being processed for paraffin embedding. HIER: Tris-EDTA, pH 9 for 20 min using Thermo PT Module.
Blocking: 0.2\% LFDM in TBST filtered thru $0.2 \mu \mathrm{~m}$.
Detection was done using Novolink HRP polymer from Leica following manufacturers instructions.
Primary antibody: dilution 1: 1000, incubated 30 min at RT (using Autostainer).
Sections were counterstained with Harris Hematoxylin.
